

# SIEMENS UPGRADE

Replace your PLC and/or HMI panel.

If your PLC is obsolete, and full replacement and spare parts are no longer available, you will be in trouble if it breaks down. Even if a hardware breakdown is unlikely, the consequences and duration of such an unplanned stop can be very expensive.

Qubiqa will be happy to prepare a detailed offer for the replacement of your PLC with the most recent generation to prepare you for the future.

The most recent generation of HMIs, offer touch technology and are compatible with most new Windows based programs.

The touch technology allows you to add further and specific buttons to your display for improved and more intuitive operation.

Accessing Windows based programs on a local HMI could be a great advantage – any production specific Word or Excel files could be read digitally, replacing printed documents. Furthermore, video sequences of machine operation and maintenance could be stored locally for training purposes and to ensure correct use.

#### Features:

- Ensures that replacements are available for your electrical hardware
- New control features can be added to your existing machines
- New buttons can be added to your HMI for better operation
- Windows based programs can be accessed on your HMI.

**”BE PREPARED AND STEP INTO THE FUTURE OF CONTROLS.”**

Qubiqa, which is the result of a merger between the former companies Univeyor and Seelen, focuses on innovative quality products and solutions for the optimization of internal logistics processes. We apply our expert knowledge in our core products and always have our customers’ “total solutions” in mind. Qubiqa intends to be the leading global supplier of intelligent and customized solutions based on innovative concepts. Qubiqa is “lean” – efficient and technologically geared for the handling of small-size as well as larger projects on a high, but cost-competitive level. The financial platform is solid, and when combined with our know-how and expertise we are ready to meet the competition both on the domestic market in Scandinavia and the UK and on the global export markets.

Qubiqa Automation in Esbjerg is a modern engineering and manufacturing company, and one of the leading researchers and developers of advanced packing and conveying systems. Qubiqa in Esbjerg was founded in 1945 and has experienced a significant development over the years. The export share is approx. 98 per cent, primarily in Europe, the US, Russia and Asia.
