

OEE OVERALL EQUIPMENT EFFICIENCY

Monitoring machine performance will help you identify ways to improve your machine efficiency.

With the proper Qubiqa software, you will be able to identify problem areas and initiate corrective actions.

Examples of monitoring:

- Machine mode statistics such as waiting for film, no incoming products, number of machine alarm stops, duration of machine stops.
- Machine availability. How many hours has the machine been operational, and what has caused the machine to be unavailable.
- Capacity statistics. Capacity of various product recipes and any historic differences.

Features:

- **Improves the machine efficiency**
- **Identifies problem areas**
- **Monitors historic changes**
- **Allows you to maintain a high-capacity output**

”MONITOR YOUR MACHINES AND INCREASE YOUR EFFICIENCY.”

Qubiqa, which is the result of a merger between the former companies Univeyor and Seelen, focuses on innovative quality products and solutions for the optimization of internal logistics processes. We apply our expert knowledge in our core products and always have our customers' "total solutions" in mind. Qubiqa intends to be the leading global supplier of intelligent and customized solutions based on innovative concepts. Qubiqa is "lean" – efficient and technologically geared for the handling of small-size as well as larger projects on a high, but cost-competitive level. The financial platform is solid, and when combined with our know-how and expertise we are ready to meet the competition both on the domestic market in Scandinavia and the UK and on the global export markets.

Qubiqa Automation in Esbjerg is a modern engineering and manufacturing company, and one of the leading researchers and developers of advanced packing and conveying systems. Qubiqa in Esbjerg was founded in 1945 and has experienced a significant development over the years. The export share is approx. 98 per cent, primarily in Europe, the US, Russia and Asia.
