

FLEXWELD UPGRADE

New, improved FlexWeld Kit.

The new, improved FlexWeld kit by Qubiqa makes it easier to maintain and adjust your FlexWeld system.

With this new system, you will experience less preventative maintenance, save time and increase reliability of the system.

The new FlexWeld kit will be integrated into your existing FlexWeld system.

We have created a new buffer system, designed an easily replaceable suspension unit, and improved the upper weld bar so that it is now fabricated in the same material.

The installation only takes one day with one further day for supervision and training of the users.

This kit will be automatically integrated into new machines that are ordered, but you can also choose to order the welding system alone.

Features:

- **Each FlexWeld will be individually customized to suit your requirements.**
- **High reliability.**
- **Easy adjustment.**
- **Save time.**

”SAVE TIME AND GET A HIGHER RELIABILITY.”

Qubiqa, which is the result of a merger between the former companies Univeyor and Seelen, focuses on innovative quality products and solutions for the optimization of internal logistics processes. We apply our expert knowledge in our core products and always have our customers’ “total solutions” in mind. Qubiqa intends to be the leading global supplier of intelligent and customized solutions based on innovative concepts. Qubiqa is “lean” – efficient and technologically geared for the handling of small-size as well as larger projects on a high, but cost-competitive level. The financial platform is solid, and when combined with our know-how and expertise we are ready to meet the competition both on the domestic market in Scandinavia and the UK and on the global export markets.

Qubiqa Automation in Esbjerg is a modern engineering and manufacturing company, and one of the leading researchers and developers of advanced packing and conveying systems. Qubiqa in Esbjerg was founded in 1945 and has experienced a significant development over the years. The export share is approx. 98 per cent, primarily in Europe, the US, Russia and Asia.
