

FILM ALIGNMENT

Install an automatic film aligning system
on your machine.

Optimize your required film width and the appearance of your product by ensuring perfect alignment of your film feed.

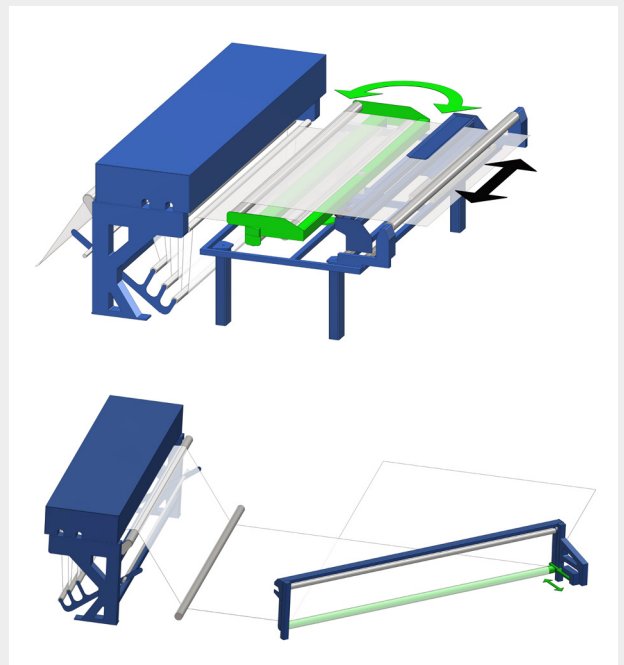

With an aligning system, you get the required and same overhang on both sides of your product.

For a multipack system, this can be crucial for obtaining a strong seal.

Two different systems are available; one for inline film feed and one for film fed into the machine at a 90° angle.

Features:

- **Poor quality and misaligned film reels will not affect your machine adversely**
- **Perfect film alignment on your pack**
- **Consistent product appearance**
- **Strong seals**

“BE PREPARED AND STEP INTO THE FUTURE OF CONTROLS”.

Qubiqa, which is the result of a merger between the former companies Univeyor and Seelen, focuses on innovative quality products and solutions for the optimization of internal logistics processes. We apply our expert knowledge in our core products and always have our customers' "total solutions" in mind. Qubiqa intends to be the leading global supplier of intelligent and customized solutions based on innovative concepts. Qubiqa is "lean" – efficient and technologically geared for the handling of small-size as well as larger projects on a high, but cost-competitive level. The financial platform is solid, and when combined with our know-how and expertise we are ready to meet the competition both on the domestic market in Scandinavia and the UK and on the global export markets.

Qubiqa Automation in Esbjerg is a modern engineering and manufacturing company, and one of the leading researchers and developers of advanced packing and conveying systems. Qubiqa in Esbjerg was founded in 1945 and has experienced a significant development over the years. The export share is approx. 98 per cent, primarily in Europe, the US, Russia and Asia.
